

HIGH-TECH PLAYGROUND

Presented by Dr. Paul Feuerstein

Check out the latest equipment and technologies in an informal setting without sales pressure right on the Exhibit Hall floor. CE courses will also be presented throughout each day.

Paul Feuerstein, DMD is the technology editor for *Dental Economics*, a technology columnist for the *Journal of the Massachusetts Dental Society*, and an ADA Seminar Series lecturer. He maintains a private practice in North Billerica, MA.

Here is your chance to try various tools and state-of-the-art equipment and ask questions. Drop in anytime, even for a few minutes, to take a look at the variety of products, or stay longer for the CE presentations running each day highlighting various categories.

TICKETED **NO CHARGE** REGISTRATION REQUIRED

A D H O T

OPEN HOUSE at the PLAYGROUND OPEN TO ALL ATTENDEES.

Come and experience many new and exciting products and demonstrations. This is your chance to discover what dental technology is right for your practice.

OPEN HOUSE Hours

Thursday	Friday	Saturday
10:00 am – 12:30 pm 2:00 – 3:15 pm 4:15 – 5:30 pm	3:30 – 5:30 pm	1:00 – 1:30 pm 2:30 – 4:00 pm

Thursday, January 31, 2013

Getting to Chartless: Products and Services to Get You There

251TL	1:00 – 2:00 pm
252TL	3:15 – 4:15 pm

The Electronic Health Record (EHR) is upon us, and new software along with several devices will get us there. These include cameras (intraoral and extraoral), digital caries detection, patient education, digital color matching, and more. Learn about these devices and try out some of these products in the Playground.

Friday, February 1, 2013

Radiographs Aren't Just X-rays Anymore

549RL	10:00 – 11:00 am
550RL	11:15 am – 12:15 pm

There has been a shift from intraoral films to sensors and phosphor plates. Not only do they reduce radiation, but they also bring the office into the chartless era as well as add many diagnostic capabilities never before available. In addition, panoramic units have gone digital and now new cone beam CT offers 3-D imaging. We will review the current sensors, software, and digital panoramic units and explore the numerous reasons for every dentist to consider the new 3-D radiographic cone beam imaging. There will also be a look at guided surgery as well as convergence with other technologies.

1 CE Hour

Do You Still Need Impression Materials and Dental Labs?

551RL	1:30 – 3:30 pm
--------------	----------------

There are many systems in the marketplace that allow the practitioner to take impressions digitally. These can now be sent to dental labs that have a digital workflow and even to labs that don't. There are systems that allow the dentist to create and manufacture restorations in the office. Discover the differences between the systems while you try them. This is a unique opportunity to see these systems side by side. Several units will be in the room, allowing attendees a one-on-one, hands-on experience.

NOTE: This is a 2 hour session.

2 CE Hours

Saturday, February 2, 2013

Should You Fill It, Seal It, or Watch It? Digital Replacements for the Explorer

714SL	9:30 – 10:30 am
715SL	11:00 am – 12:00 pm

Radiographs and explorers often cannot show the extent of carious or decalcified lesions. New advanced technology has stepped in to help us. There are several new devices that can detect caries from the outside of the tooth or inside during procedures. The words "watch" and "got it all" will have new meaning to you after using these devices in the Playground. New restorative aids and clinical tips will also be shown.

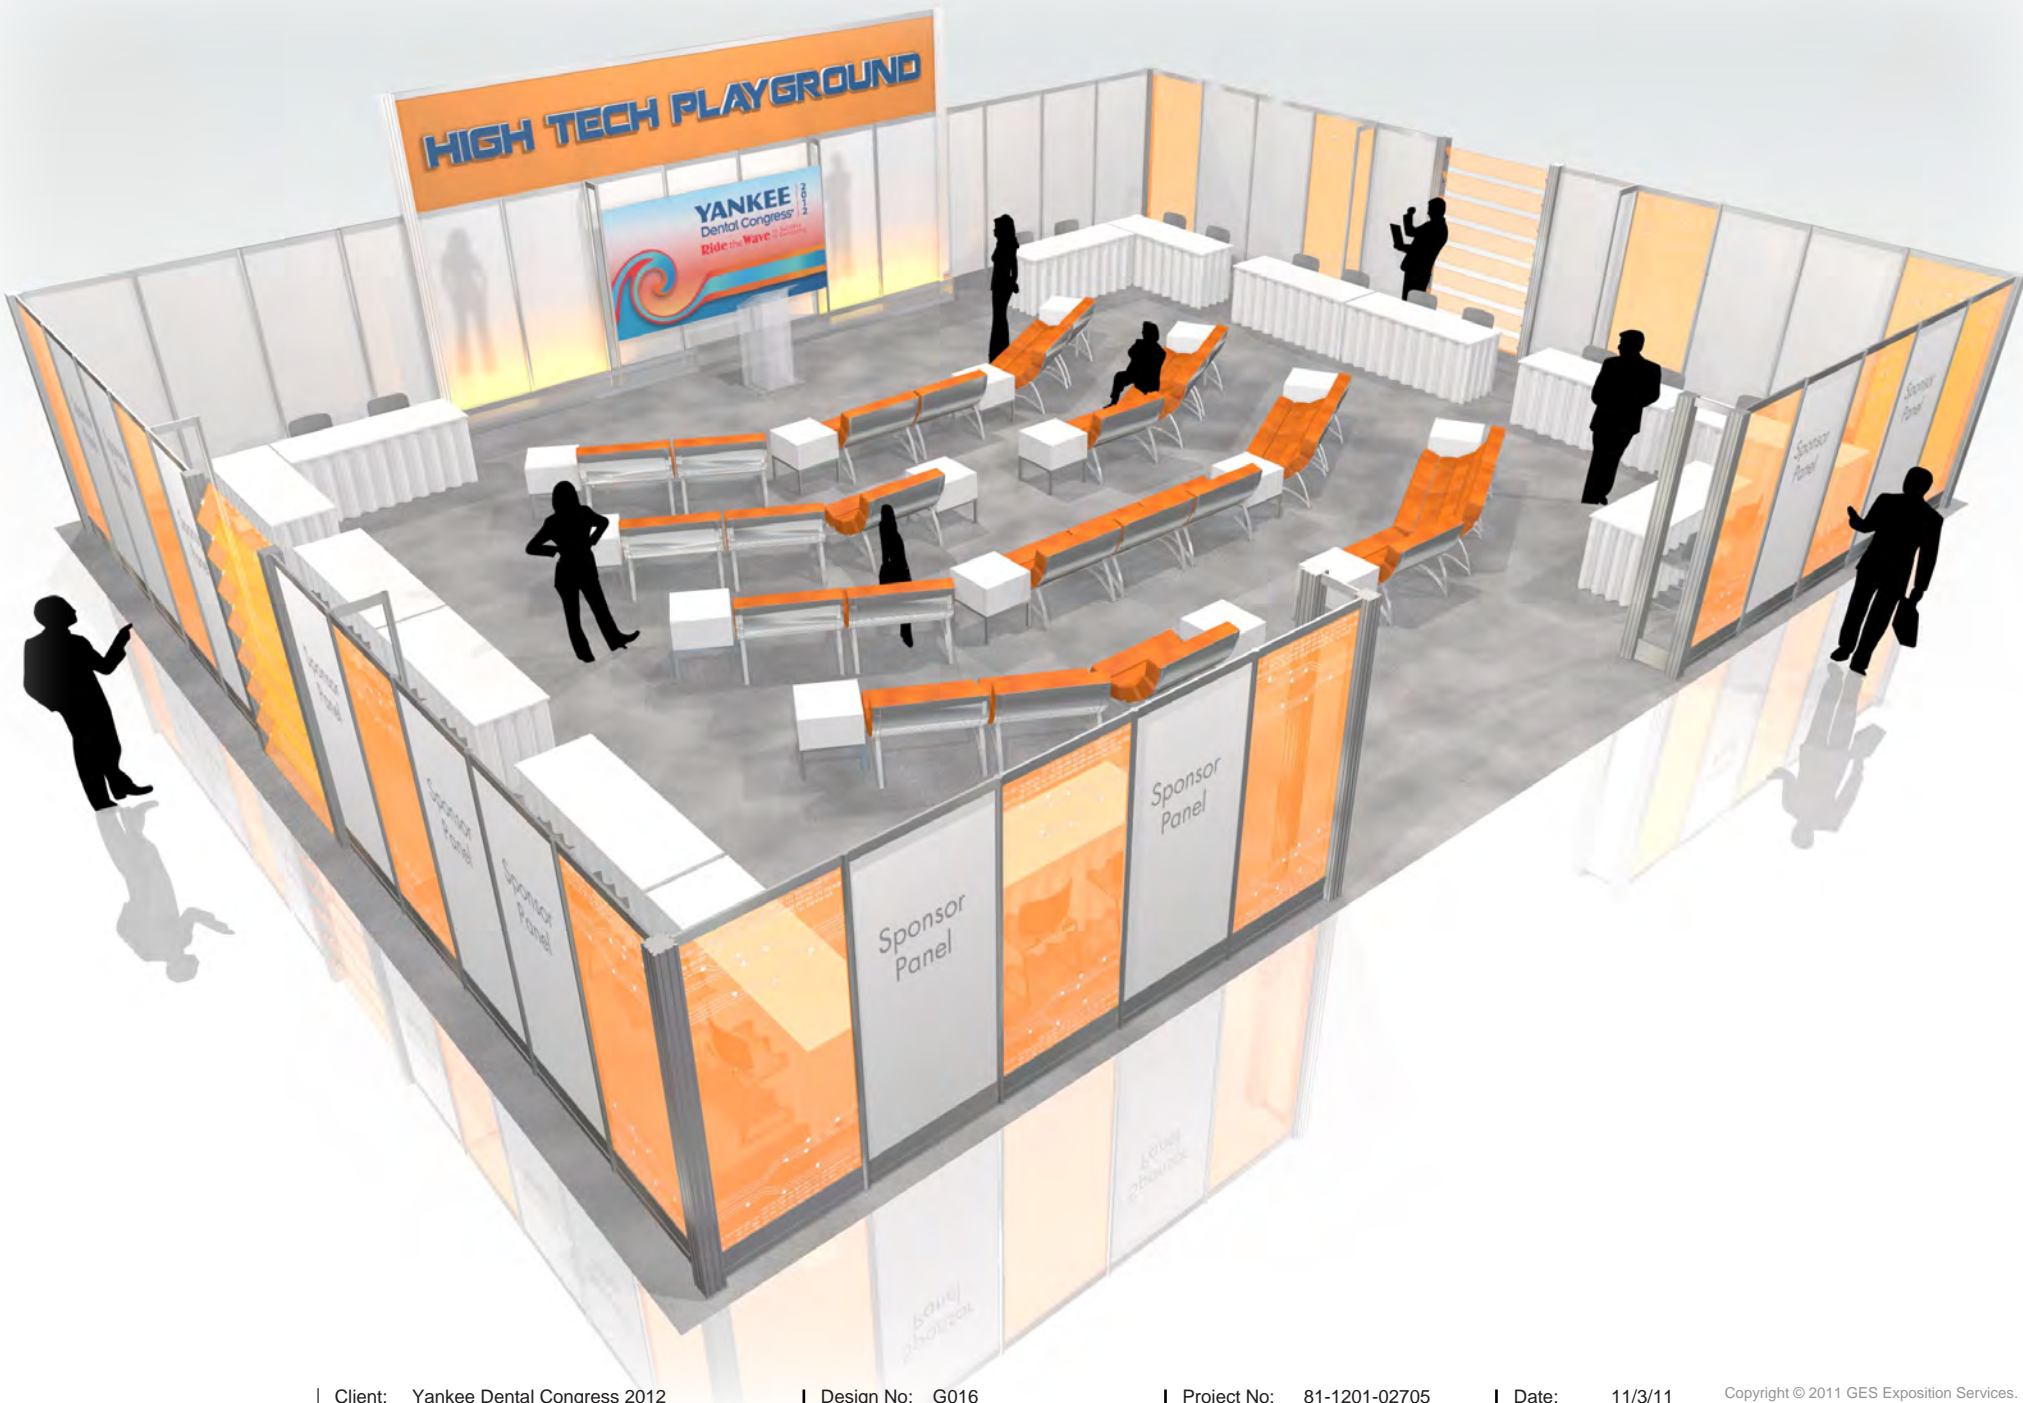

1 CE Hour

Potpourri of New Products

716SL	1:30 – 2:30 pm
--------------	----------------

See the latest digital entries in all aspects of clinical dentistry. The newest products from the Yankee Exhibit Hall floor as well as some that are a preview of what's to come will be displayed in the Playground for attendees to see, try, and learn about in this informal setting.
